

# Nguyễn Hoàng Hiệp

## Java Developer

I have some experience in analysis, developing, debugging, designing, and deployment of application software in web-based environments and client/server architectures.

I would like to be a part of the organization to contribute my abilities to the growth of the company as well as my own professional career.  
My goal is to become a full-stack developer in the next few years.

### EDUCATION

**Electronic Telecommunication** 9/2017 - 12/2020  
Hanoi University of Science and Technology  
Level : Fourth-year student

### PROJECTS

Project 1: Shoe shop OnlineTechnology: Java Servlet, JSP, JDBC, HTML, CSS, JavaScript, MySQL.Description: The main aim of application is to help the customer easily see available shoes through my own website instead of visiting the shop. Besides, customers can order and pay online invoices on the website.Link Github: <https://github.com/hoanghiepl32/shoes-shop>

Project 2: Store Management SystemTechnology: Java Spring Boot, HTML, Bootstrap, JQuery, MySQLDescription: This system is developed based on the website platform in order to help users manage their own store. System provides free services to help users easily manage resources of store such as merchandises, employees, suppliers,... This system is able to suitable for several kinds of stores such as mini-supermarket, clothes store.
